

From june-2019 | Page 2:

Q1(a)(i): The following sentences describe the purpose of a CPU. Complete the sentences by filling in the missing words. CPU stands for It is the part of the computer that fetches and executes the that are stored in The CPU contains the Arithmetic Unit (ALU) and the Unit (CU).

From june-2019 | Page 3:

Q1(a)(iii): Explain how the cache size can affect the performance of the CPU.

From june-2022 | Page 3:

Q2: Complete the table by writing the missing definition or name of each of the common CPU components and registers.

From june-2024 | Page 12:

Q6(a): Describe what happens during the fetch-execute cycle.

Q6(b): Complete the table by writing the name of two registers used in the fetch-execute cycle and the purpose of each register.

From nov-2019 | Page 2:

Q1(a)(i): The following sentences describe the purpose of a CPU. Complete the sentences by filling in the missing words. CPU stands for It is the part of the computer that fetches and executes the that are stored in The CPU contains the Arithmetic Unit (ALU) and the Unit (CU).

From nov-2019 | Page 3:

Q1(a)(iii): One computer has 64 kilobytes of cache and the other has 512 kilobytes of cache. Explain how the cache size can affect the performance of the CPU.

From nov-2020 | Page 6:

Q3: Draw one line from each part of the processor to its correct definition.

From nov-2021 | Page 2:

Q1(b)(i): State the purpose of a CPU.

Q1(c): Identify two registers used in Von Neumann architecture.

From sample-paper | Page 2:

Q1(c): Explain one reason why the cache size affects the performance of the CPU.

Q1(d): Identify two events that take place during the fetch-execute cycle.
