

From june-2019 | Page 14:

Q4(a)(i): Draw the devices and connections in the office star network. All devices must be clearly labelled.

Q4(a)(ii): Describe the role of the switch in the office network.

From june-2019 | Page 15:

Q4(b)(i): Describe how introducing wireless access could have slowed down the network.

Q4(b)(ii): Identify two other factors that can affect the performance of a network.

From june-2019 | Page 16:

Q5(a): Describe the relationship between the website URL (<https://www.ocr.org.uk>), the IP address and the webserver.

From june-2022 | Page 4:

Q3(a)(i): Explain why the number of devices using the network at the same time can affect the performance of the network.

Q3(a)(ii): Identify one other factor that can affect the performance of the network.

Q3(b): Complete the description of accessing websites using the given list of terms. Not all terms will be used. A website is hosted on a The computers that access the websites are called The user enters the into a web browser. The web browser sends a request to the for the matching IP (Internet Protocol) address. If found the IP address is returned. A request is then sent to this IP address. An IPv4 address is made of 4 groups of digits. Each group can be between the denary values and The groups of digits are separated by a

From june-2022 | Page 5:

Q3(d): Identify three tasks carried out by a router.

From june-2023 | Page 4:

Q2(b)(i): One characteristic of a LAN is that they are set up over a small geographical area. Give one other characteristic of a LAN.

From june-2023 | Page 5:

Q2(b)(ii): Describe the benefits of the student changing their home LAN to include wireless connections.

Q2(b)(iii): State two drawbacks of changing their home LAN to include wireless connections.

From june-2023 | Page 11:

Q5(c)(i): Identify the computer that is acting as the client in this scenario and justify your choice.

Q5(c)(ii): Identify the computer that is acting as the server in this scenario and justify your choice.

From june-2024 | Page 4:

Q2(b)(ii): Explain the reasons why the airport should also allow the network to be accessed using a wireless connection.

From june-2024 | Page 5:

Q2(c)(i): Draw a diagram to show how the five computers, switch and two printers are connected in a star topology.

Q2(c)(ii): Give one benefit and one drawback of the office using a star topology instead of a mesh topology.

Q2(c)(iii): Describe the role of the switch in the star topology.

From nov-2019 | Page 14:

Q4(a)(i): Draw the devices and connections in the office star network. All devices must be clearly labelled.

Q4(a)(ii): Describe the role of the switch in the office network.

From nov-2019 | Page 15:

Q4(b)(i): Describe how introducing wireless access could have slowed down the network.

Q4(b)(ii): Identify two other factors that can affect the performance of a network.

From nov-2019 | Page 16:

Q5(a): Describe the relationship between the website URL (<https://www.ocr.org.uk>), the IP address and the webserver.

From nov-2020 | Page 3:

Q2(a): State whether Hope's network is a LAN or a WAN. Justify your choice.

Q2(b): Identify one device that Hope can use to connect her home network to the Internet.

From nov-2020 | Page 4:

Q2(c)(i): Explain why the laptop's network performance is lower in the bedroom.

Q2(c)(ii): State two ways Hope could improve the wireless network performance in the bedroom.

Q2(d): Explain why Hope's network uses a peer-to-peer model and not a client-server model.

From nov-2020 | Page 5:

Q2(e): Describe the benefits and drawbacks to Hope of storing her files on the cloud.

From nov-2020 | Page 13:

Q6(a): Draw connections to show one way that the devices could be connected using a mesh topology.

From nov-2020 | Page 14:

Q6(c)(i): Explain how the URL www.ocr.org.uk is converted into the IP address.

From nov-2021 | Page 8:

Q7(a): Describe the difference between a LAN and a WAN.

Q7(b): Complete the network diagram for site A of the University.

From nov-2021 | Page 9:

Q7(c)(i): Explain how each of the following can contribute to the performance of a network.

Q7(c)(ii): Identify one other factor that can contribute to the performance of a network.

From sample-paper | Page 7:

Q7(c): Give two reasons why the bakery may use a star network topology for their LAN.

From sample-paper | Page 10:

Q10(a): Define what is meant by a Wide Area Network.

Q10(b): Explain two advantages to the law company of storing their data in the Cloud.

Q10(c): Explain two disadvantages to the law company of storing their data in the Cloud.
