

From june-2019 | Page 7:

Q2(a): The operating system provides file management. Identify three ways that Xander can make use of the file management facility.

From june-2019 | Page 9:

Q3(a)(i): Describe the problems that can arise from unauthorised access to his laptop and confidential documents.

Q3(a)(ii): Describe two ways Hamish can help prevent unauthorised access to his laptop.

From june-2019 | Page 10:

Q3(b)(i): Explain how encryption helps to protect Hamish's documents.

From june-2022 | Page 8:

Q5(b): Identify and describe two software-based security methods that the company can use to protect their computer systems and data.

From june-2023 | Page 9:

Q4(a): Tick (3) one or more boxes on each row to identify all of the methods that can help to prevent each threat.

Q4(b): Name and describe one threat to a computer system that is not given in question 4(a).

From june-2023 | Page 10:

Q5(a)(i): Explain why a computer needs both primary and secondary storage.

Q5(a)(iii): The computer has Virtual Memory (VM). The table has four statements about VM. Not all of the statements are correct. Tick (3) the True column for the statements that are correct. Re-write any statement that is incorrect in the False column by changing the statement to make it true.

From june-2024 | Page 6:

Q3(a): The table contains operating system functions and a task that each function performs. Complete the table by writing the two missing function names and a task performed by the two given functions.

From june-2024 | Page 13:

Q7(b)(iii): Explain why the 'Follow Me' system does not need virtual memory.

From nov-2019 | Page 7:

Q2(a): The operating system provides file management. Identify three ways that Xander can make use of the file management facility.

From nov-2019 | Page 9:

Q3(a)(i): Describe the problems that can arise from unauthorised access to his laptop and confidential documents.

Q3(a)(ii): Describe two ways Hamish can help prevent unauthorised access to his laptop.

From nov-2019 | Page 10:

Q3(b)(i): Explain how encryption helps to protect Hamish's documents.

From nov-2020 | Page 2:

Q1(a): The table has four potential threats to data. Write one prevention method for each threat in the table. Each prevention method must be different.

Q1(b): Name two other threats to the data in a computer system and give a method of preventing each.

From nov-2020 | Page 9:

Q5(a): Complete the following description of the functions of an operating system by selecting the appropriate missing words from those in the box.

From nov-2020 | Page 11:

Q5(c): Ali's computer uses virtual memory. Ali has written two procedures to help himself understand how virtual memory works.

From nov-2021 | Page 3:

Q2(a): Identify and describe two functions of an operating system.

From nov-2021 | Page 10:

Q7(d)(i): Describe the threat malware can pose to the university's network and give a prevention method that the university can use.

Q7(d)(ii): Describe the threat a brute force attack can pose to the university's network and give a prevention method that the university can use.

From sample-paper | Page 8:

Q8(a): Staff already use strong passwords to protect systems. Explain, with reference to system security, three other ways that the hospital could protect the network system.

Q8(b): Identify three errors that the hospital staff could make that may endanger the security of the network. Outline a procedure that could be put in place to prevent each error.
