

### **From jun-2022 | Page 30:**

Q10 (a): Explain what will be observed on the meter when the magnet is pushed in and pulled out of the coil, repeatedly.

### **From jun-2022 | Page 32:**

Q10 (c): Using Figure 22, explain the stages in the process of delivering electricity efficiently from P to T. Your answer should include details of the effects that Q, R and S have on efficiency.

### **From jun-2023 | Page 23:**

Q8 (a) (iii): Explain how using the device can help to increase the time that the car can be driven before the battery becomes discharged.

### **From jun-2023 | Page 30:**

Q10 (a) (i): Which row of the table shows how the rotation of the handle has changed between (a) and (b)?

Q10 (a) (ii): Explain why it is more difficult to turn the dynamo when it is connected to a lamp.

### **From june-2024 | Page 32:**

Q10 (a) (i): Explain why the voltmeter shows a reading as the magnet passes through the coil.

Q10 (a) (ii): Describe how the student could use the arrangement in Figure 23 to do this investigation.

### **From nov-2021 | Page 28:**

Q9 (c): Explain why the current changes in the way shown by the graph in Figure 20. Your answer should include details of the position of the coil relative to the magnet at each of the times labelled P, Q, R, S and T.
