

From jun-2018:

Q9: "dynamo" appears in part (a): "Which of these could be the output for a dynamo?" - This is explicitly about dynamo!

From jun-2019:

From jun-2020:

From jun-2022:

Q10: "Figure 20 shows a magnet and a coil... Explain what will be observed on the meter when the magnet is pushed in and pulled out of the coil, repeatedly." - This is about electromagnetic induction but not explicitly about "dynamo"

From jun-2023:

Q10: "Figure 23 shows a model dynamo... The dynamo contains a coil of wire that can spin inside a permanent magnet. The dynamo produces a D.C. output." - This is explicitly about dynamo!

From jun-2024:

From nov-2021:

Q9: "Figure 19 shows a coil of wire that is being rotated between the poles of a magnet" - This is about generators but not explicitly "dynamo"

From specimen:

From jun-2018 | Page 28:

Q9(a): "Which of these could be the output for a dynamo?"

From jun-2023 | Page 30:

Q10(a): "Figure 23 shows a model dynamo. The dynamo contains a coil of wire that can spin inside a permanent magnet. The dynamo produces a D.C. output. A teacher connects a voltmeter to the terminals of the dynamo. The teacher rotates the handle to make the coil spin inside the magnet. Figure 24(a) shows the reading on the voltmeter. The teacher then rotates the handle differently. Figure 24(b) shows the new reading on the voltmeter."
